

Elastic Extension Springs & Components

Specialists in precision high-performance elastic based extension springs and tethering devices

At 3X Springs, we take pride in our dependability and unified mission. We manufacture with the highest attention to quality and safety for elastic extension and retraction springs, tool tethers, and tie-downs, along with many other business and manufacturing materials.

**Elastic
Extension Springs**

**Elastic
Tool Tethering**

**Bungee
Tie Downs**

To maintain our vision, our skilled engineers and technicians work side by side to create customizable, tailor-made solutions for your business based on your needs and requests. Our solutions are uniquely made with our own original technology, tested over years of experience to ensure the best performance, durability, and function.

Our customers have benefitted from our services in numerous industries all over the globe.

Some of our customers:

McMASTER-CARR® FASTENAL®

CATERPILLAR® FECON®

UNITED

Highly customizable and able to meet high and low demand volumes

Comprehensive facilities and integrated capabilities:

Our engineers, technicians, and producers work in tandem to see products through the entire creation process for:

- Elastic tubing and cutting
- Sewing, textiles, and fabrics
- Research and development
- 24-hour prototyping
- On-site stress, tensile, and static testing using force gauges for all products

Superior engineering and technical expertise:

- Our engineers carry over 30 years experience in the industry designing our exact products.
- Customizations available for every piece of every product
- In-house product development from conceptualization to manufacturing
- On-site quality control

Robust quality and processes:

- Elastic products are guaranteed to extend up to 3x their original length while staying functional.
- Patented safety sleeve technology both prevents wear and tear and protects the user and environment from the danger associated with breakages.
- Ability to create any order size

3X Springs has been in the business of creating customizable solutions for its customers since 2008. We pioneered the safety sleeve elastic spring and capitalized on that technology to specialize in industrial solutions that are safe, high-performance, and logical.

This safety focus is the basis for much of Stroops ongoing product development as they continue to innovate and transform industrial products worldwide.
